

HTC Greyline™ diamond tools

The HTC Greyline™ standard diamond tools comes in three different grit sizes for removal of coatings and leveling of concrete and one tool, the EZ GL T-Rex™ for stripping and coarse grinding.

- Concrete grinding
- Removal of old coverings (like Epoxy, self-leveling compound, paint etc)
- Surface leveling of old and newly casted concrete slabs

EZ GL T-Rex™ (Item Number: 501772)

An extremely rough floor prep tool for removal of thick glue, coverings (like Epoxy, self-leveling compound, paint etc).

To be used when you need a tough tool for stripping and coarse grinding. Gives a rough end result.

EZ GL 0 Purple (Item Number: 212236)

A very coarse floor prep tool for removal of glue, coverings (like Epoxy, self-leveling compound, paint etc).

Used when you need a very coarse tool for stripping and coarse grinding. Gives a very coarse end result.

Also available: single segment version (212237).

EZ GL 1 Silver (Item Number: 212238)

A coarse floor prep tool for removal of glue, coverings (like Epoxy, self-leveling compound, paint etc).

Used when you need a coarse tool for stripping, coarse grinding or as a starting tool on newly casted concrete that has not been trowelled. The tool gives a coarse end result.

Also available: single segment version (212239).

EZ GL 2 Gold (Item Number: 212240)

A grinding tool for removal of thin layers of glue, coverings (like Epoxy, self-leveling compound, paint etc).

Used when you need a finer tool for stripping, coarse grinding or as the second step after 0 or 1. The tool gives a fine end result.

Also available: single segment version (212241).
